ABOUT ME

I am always committed to anything I do, extremely responsible and independent. When needed I will always provide help to those who need it and make them feel welcome and comfortable.

I have so many interests that it is sometimes hard to keep up with them all, but I manage and slowly progress all of them at once, just like progression of tasks in a long-term project.

I am a big animal lover and always try to preserve the environment however I can, introducing recycling or volunteering for clean-ups.

EXPERIENCE

2016 - Present
(Molina de Segura-Spain)

VRIO.

IT Developer and Project Manager
IT Developer in charge of maintaining the application used by the company for most operations, including billing, accounting, customer management and relations, stock inventory, and external integrations. 6 years of experience.
